

Arant; SN09/397,325; Docket 0147

**ABSTRACT OF THE DISCLOSURE**

A method of composing information by electronically advancing a sequence of information elements at controlled speed in an even step-wise fashion into a fixed transfer location while visibly displaying each of them there during a dwell time to permit the operator to decide whether to select it for manually directed copying into an output sequence. The speed of advance of the sequence of information elements and hence the dwell time for display of each information element is manually adjusted from time to time.
